PROFESSIONAL SUMMARY

Cybersecurity professional and L2 SOC Analyst with 8+ years across system administration, network security and infrastructure, and proven experience architecting, deploying and managing Security Operations Centers from the ground up. Adept with advanced SIEM platforms, secure network architecture and complex threat analysis, combining a strong business-risk foundation with deep technical expertise in endpoint security and traffic analysis. Driven by active defense and security engineering, and motivated to contribute to advanced, high-security environments such as anti-piracy and game-security platforms.

CORE COMPETENCIES

Security Operations: SOC build-out & management, L2 incident analysis, SIEM deployment (Wazuh), threat hunting, EDR, log analysis & forensics

Network & Infrastructure: MikroTik firewall design, advanced routing, high-availability dual-WAN failover, traffic shaping, VLANs, Windows Server & Active Directory, Microsoft 365

Secure Communications: Enterprise VPN (WireGuard, OpenVPN), secure VoIP (Asterisk / Issabel / FreeSWITCH), SIP dial-plan hardening

Risk, Cloud & Tooling: IT security auditing, vulnerability assessment (Nessus), business impact analysis, NIST CSF, Azure & AWS security, Microsoft Sentinel & KQL, Wireshark

Programming & Automation: Python, PowerShell, Bash, SQL, C#, JavaScript

PROFESSIONAL EXPERIENCE

SOC Lead & Infrastructure Security Engineer

2022 – Present

Independent / Project-Based

- Designed and deployed a functional Security Operations Center end-to-end, from architecture through to live monitoring.
- Engineered and deployed Wazuh SIEM across enterprise networks, authoring custom detection rules and analyzing telemetry from multiple endpoints.
- Architected resilient MikroTik environments with complex port forwarding, traffic shaping and dual-WAN automated failover to guarantee near-zero downtime.
- Packaged and delivered security service tiers spanning threat monitoring, secure remote access and perimeter defense.

Freelance Cybersecurity & Systems Engineer

2022 – Present

Upwork

- Provide international consulting across three pillars: SOC/SIEM implementations (Wazuh), secure remote access (VPNs) and enterprise VoIP (Asterisk / FreeSWITCH).
- Perform deep-dive troubleshooting on SIP dial plans, network bottlenecks and secure data-transmission protocols.
- Design custom security architectures that bridge business-continuity requirements with strict technical controls.

System Administrator & Technical Support Leader

Nov 2022 – Present

ERTAQY Software for Business Development — Riyadh, Saudi Arabia

- Maintain core IT infrastructure including servers, network devices and security controls.
- Lead a technical support team resolving 500+ incidents annually.
- Administer Windows Server, manage user access, and apply security updates and patch management.
- Implement firewall rules, VPN configurations and network segmentation to strengthen the security posture.
- Improved system resilience through enforced backup strategies and security policies.

IT Support Specialist & Software Tester

Oct 2019 – Nov 2022

Al-Abdellatif Altarshouby Pharmacies

- Delivered IT support and security for 30+ branches, hardening POS and network devices.
- Deployed endpoint protection and password policies across multiple sites.
- Performed QA testing and security checks on new ERP software modules.
- Ensured secure connectivity for remote branches via VPN.

IT Support Technician (Military Service)

Jan 2018 – Mar 2019

Egyptian Naval Forces — Financial Department

- Delivered hardware and software support for critical financial systems.
- Ensured secure daily operations through proactive maintenance and troubleshooting.

KEY PROJECTS & HANDS-ON LABS

- **Vulnerability Assessment Lab (2023 – Present)** — Built a virtualized enterprise environment in VirtualBox; ran credentialed Nessus scans against intentionally vulnerable systems, performed full audits and implemented remediation that measurably strengthened security posture.
- **WireGuard VPN Infrastructure (VPS)** — Deployed a full WireGuard infrastructure on an international VPS with key management, /32 peer segmentation, firewall whitelisting, DNS overrides and end-to-end testing for secure, high-performance geo-distributed access.
- **OpenVPN on MikroTik** — Built a production-grade OpenVPN server using a static public IP, certificate-based authentication, NAT/firewall policies and optimized routing for secure home-lab remote access.
- **Risk Register & NIST CSF Assessment** — Built a risk register for a financial institution, scoring major threats including business email compromise, database compromise and supply-chain disruption, and produced a prioritization matrix aligned with NIST CSF.
- **Network Fundamentals Course (2025 – ongoing)** — Designed and delivered a self-paced, security-first networking course for IT beginners.

EDUCATION

M.Sc. Computer Science

2022 – 2026 (in progress)

Cairo University, Egypt

B.Sc. Accounting (Bachelor of Commerce)

2014 – 2017

Mansoura University, Egypt

Financial and auditing foundation that strengthens IT risk assessment, compliance, and translating technical cyber threats into quantifiable business impact.

CERTIFICATIONS

Completed

- CompTIA Security+ (SY0-701)
- Microsoft SC-200 — Security Operations Analyst
- Microsoft SC-500 — Secure Cloud & AI Solutions
- Google Cybersecurity Professional Certificate
- CCNA — Cisco Certified Network Associate
- MCSA — Microsoft Certified Solutions Associate

In Progress / Roadmap

- eJPTv2 (INE) · AWS Certified Security – Specialty · Google Professional Cloud Security Engineer · CISA (ISACA)

LANGUAGES

Arabic (Native) · English (Fluent — IELTS 7.0) · German (Beginner) · French (Beginner)
